Eurovent releases new insightful Recommendation

Brussels, 05 June 2025. Eurovent has published a new Recommendation, which addresses the implications of the European Commission's December 2024 FAQs concerning incomplete product deliveries within the context of EU regulations.

The new Recommendation provides manufacturers, suppliers, and other stakeholders with practical guidance on how to interpret and respond to the clarifications introduced by the Commission's FAQ. These clarifications, which relate to the placing on the market of products and systems that are delivered in parts, have significant ramifications for compliance under the Ecodesign and Energy Labelling frameworks. Key elements of Recommendation 14/8 include a detailed analysis of the legal and operational impacts of the December 2024 FAQ, clarification of scenarios where products are delivered incomplete and guidance on documentation, conformity assessment, and market surveillance considerations.

Upon completion of the Recommendation, Maurizio Orlandi, Chairperson of the Eurovent PG-RDC stated: "The PG-RDC participants connected the dots by gathering all related questions and answers from different FAQs and the Blue Guide. By reading these questions alongside the last published FAQ on incomplete products and identifying the links between them, they created a comprehensive document that provides a clear overview of the entire issue. Now, business operators have a useful detailed guide on the complex aspects of placing incomplete products on the market."

This Recommendation prepared in a joint effort by participants of the Product Group 'Commercial Refrigeration Equipment' (PG-RDC), is part of Eurovent's ongoing work to ensure the practical implementation of EU environmental and product legislation across its industry sectors. The Product Group covers refrigerated display cabinets, walk-in cold rooms, commercial beverage coolers, ice-cream freezers and refrigeration packs. Its main tasks are advocacy on European and national legislation, development of EN, ISO and Eurovent standards,

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
