RECUTECH: Platinum Sponsor of 2025 EUROVENTSUMMIT

Prague, Pardubice, 15 July 2025. RECUTECH, a global innovation leader in energy recovery technologies based in the Czech Republic, has been announced as the Platinum Sponsor of the 2025 EUROVENTSUMMIT.

RECUTECH manufactures a wide range of Eurovent-certified heat exchangers, including aluminium, plastic, enthalpy, and rotary types, up to market-leading large sizes. Since its founding in 2007, the company has grown into a global player, operating 15.000 m² of advanced production space and delivering up to 150.000 units annually.

“With the Summit taking place in our home country, we are proud to support it as a Platinum Sponsor”, said Filip Hazuka, CEO of RECUTECH. “Our people embody **#ManufacturingForTomorrow** every day. We believe that quality and reliability are essential to success; that’s why we offer only certified products. We look forward to showcasing our innovations and large-scale facilities to guests from around the globe.”

As a responsible company, RECUTECH places sustainability at the heart of its operations, not just in product design, but also across all company processes. Through its ‘For More Green’ initiative, launched in 2016, the company donates 10 cents from each sold heat exchanger to fund tree planting. Mature trees are planted in areas where they are most needed, in cooperation with the Czech organisation Sázíme stromy. Some of the planting events also serve as company teambuilding activities. So far, RECUTECH has planted trees worth over 47.852 EUR.

Only silicone-free and isocyanate-free adhesives are used in production, protecting the environment, employees, and end customers. Waste is kept to a minimum, sorted, and reused wherever possible. For example, aluminium coil waste is returned to the supplier for reprocessing into new materials. Even furniture and equipment from trade fair stands are reused and are now being used to furnish RECUTECH’s company showroom. Disposable packaging and tableware are avoided, and the company proudly bears the Green Dot symbol for responsible waste management.

RECUTECH is also transitioning towards Environmental Product Declarations (EPDs), further enhancing transparency in product environmental impact. The company holds numerous internationally recognised certificates for quality, safety, and environmental management. All RECUTECH certifications are available at [RECUTECH Certificates](#).

2025 **EUROVENTSUMMIT** participants will be invited to join exclusive guided tours of RECUTECH’s Pardubice megafactory, bookable during the Summit registration. The programme will also include seminars on sustainability and circularity, alongside networking evenings that bring together hundreds of HVACR professionals from across Europe.

“The 2025 **EUROVENTSUMMIT** is both an honour and a strategic opportunity for us to share our green approach and inspire the HVACR industry toward a more sustainable future”, Hazuka concludes.

More information about RECUTECH is available at the [RECUTECH website](#). Register now for the 2025 **EUROVENTSUMMIT** and join 300+ key HVACR industry stakeholders on 24-26 September in Prague and play a pivotal role in shaping the future of HVACR manufacturing and sustainability.

About 2025 EUROVENTSUMMIT

The theme of 2025 **EUROVENTSUMMIT**, **#ManufacturingForTomorrow**, highlights the importance of circularity and sustainability in the HVACR industry. It emphasises our industry's commitment to measure and manage its environmental impacts, paving the way for a more sustainable future. Taking place in Prague, Europe's manufacturing heartland, the Summit's choice of venue underscores how sustainability and green tech manufacturing enhance the global competitiveness of our European HVACR industry.

About us

Eurovent

[Eurovent](#) is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Eurovent Certification

[Eurovent Certification](#) is the leading European certification body providing voluntary 3rd party HVACR product certification, offering a one-stop service. It certifies product performance according to European and International standards, for a full range of residential and industrial HVACR products. 3rd party certification enhances customer confidence, levels the competitive playing field for all manufacturers and ensures accurate performance ratings.

Eurovent Market Intelligence

[Eurovent Market Intelligence](#) is the European statistics office for the HVACR market. Since 1994, It has been a trusted partner for over 500 manufacturers (current number), providing confidential market data. It maps sales across Europe, the Middle East, and Africa, offering annual and quarterly reports, trends, and forecasts, detailed information on the sold equipment (technology, capacity, etc.) and country-specific analysis.
