## New Recommendation on Commercial Refrigeration

**Brussels, 25 November 2025. Eurovent released a new Recommendation on applying safety and environmental laws to commercial refrigeration. It was developed by the Eurovent Product Group ‘Commercial Refrigeration Equipment’ (PG-RDC).**

The recommendation provides a comprehensive guide to the application of European and national safety and environmental regulations in the design, installation, maintenance, and decommissioning of commercial refrigeration systems. It serves as a key reference for manufacturers, installers, maintenance technicians, designers, and operators across the EMEA market.

The document covers a full overview of the regulatory and standardisation framework for refrigeration systems and equipment, and on safety classifications and environmental impact of refrigerants, including those affected by the PFAS issue under REACH.

Eurovent PG-RDC Secretary, Massimiliano Ferrario, stated: “This Recommendation equips the industry with essential clarity at a crucial time. By aligning technical practice with evolving safety and environmental rules, we help ensure that refrigeration systems remain safe, sustainable, and future-ready across all EMEA markets.

The Eurovent Product Group ‘Commercial Refrigeration Equipment’ (formerly ‘Refrigerated Display Cabinets’) covers refrigerated display cabinets (remote and integral units), walk-in cold rooms, commercial beverage coolers, ice-cream freezers and refrigeration packs. Its main tasks are advocacy on European and national legislation, development of EN, ISO and Eurovent standards, promotion of the industry and its export initiatives.

**The document can be downloaded free of charge on the [Eurovent website](#).**

## About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

## Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

## Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
