## Eurovent unveils cPCR Guide for Heat Pump & AC

**Brussels, 17 March 2026. Eurovent has published a new Recommendation providing guidance on complementary Product Category Rules (cPCR) for heat pump and air-conditioning equipment. It aims to support the development of consistent EPDs and advance harmonised LCA practices.**

The Recommendation outlines methodological rules complementary to existing standards such as EN 15804 and EN 50693 for preparing EPDs for heat pump and air-conditioning equipment. It is intended to serve as a reference for manufacturers, consultants, and environmental experts until a harmonised European cPCR standard is developed.

The Recommendation aims to improve transparency and comparability of environmental data within the HVAC industry. Harmonised approaches to life-cycle assessment and EPDs are increasingly important as sustainability requirements expand under European regulatory frameworks and building policies.

Eurovent Deputy Secretary General, Stijn Renneboog, announced that: “The publication provides guidance on key aspects required for reliable environmental reporting, including product description and scope, functional and declared units. This is part of Eurovent’s broader programme to harmonise environmental product declarations across multiple HVAC product categories and support the industry’s transition toward more transparent and standardised sustainability reporting.”

**The full Recommendation is available for download on the [Eurovent website](#).**

## About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

## Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

## Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
