Eurovent, AMCA and EVIA publish 2nd edition of FAQ guide on Fans

Brussels, Warsaw, 14 May 2026. Eurovent, in collaboration with AMCA Europe and EVIA, has published the second edition of a joint Frequently Asked Questions (FAQ) guide on Regulation (EU) 2024/1834, as amended, laying down Ecodesign requirements for fans.

Following the publication of the first edition in September 2025, experts from the three associations continued their cooperation to develop a common industry interpretation of further provisions of Regulation (EU) 2024/1834 on Ecodesign requirements for fans, which was amended in the meantime by Regulation (EU) 2025/2481.

In addition to addressing several general issues, the new FAQs included in the second edition cover aspects related to product information requirements, information requirements at partial load, resource efficiency requirements concerning spare parts, and product information requirements for spare part fans.

This guide was prepared in a joint effort by participants of the Eurovent Product Group 'Fan Technology (PG-FANS), members of AMCA Europe and members of the EVIA Fans Working Group, which represents a vast majority of all manufacturers of these products active on the EMEA market.

The full document is available for download on the [Eurovent website](#)

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
