Eurovent issues new AHU controls Recommendation

Brussels, 09 September 2025. Eurovent has released a Recommendation on AHU controls in Building Automation under the revised EPBD, outlining how integrated systems support compliance, enable monitoring, and optimise energy use.

The recommendation outlines the capability of available AHU control systems to foster objectives of Directive 2024/1275, Recast EPBD, in a technically and economically feasible way. It provides recommendations on specific requirements to be implemented in the transposition of the Directive by Member States to fulfil the provisions of Article 13(10), which are intended to support national legislators in developing a clear interpretation of the term ‘technically and economically feasible application’.

Igor Sikonczyk, Technical and Regulatory Affairs Manager at Eurovent and Secretary of the Product Group ‘Air Handling Units’ (PG-AHU), stated: “With the revised EPBD setting ambitious requirements for building automation, the Eurovent Recommendation 6/20 provides clear, practical guidance on how air handling unit control systems can play a central role in delivering both energy efficiency and healthy indoor environments in Europe’s buildings.”

The Recommendation is intended to support policymakers, manufacturers, designers, and building operators in implementing cost-effective solutions that align with EU climate and health objectives.

The document can be downloaded free of charge on the [Eurovent website](#).

About Eurovent

Eurovent is the voice of the European HVACR industry, representing over 100 companies directly and more than 1.000 indirectly through our 16 national associations. The majority are small and medium-sized companies that manufacture indoor climate, process cooling, and cold chain technologies across more than 350 manufacturing sites in Europe. They generate a combined annual turnover of more than 30 billion EUR and employ over 150.000 Europeans in good quality tech jobs.

Mission

Eurovent's mission is to bring together HVACR technology providers to collaborate with policymakers and other stakeholders towards conditions that foster fair competition, innovation, and sustainable growth for the European HVACR industry.

Vision

Eurovent's vision is an innovative and competitive European HVACR industry that enables sustainable development in Europe and globally, which works for people, businesses, and the environment.
